

SR1-REL-LP0-VP
25mm and 50mm Metal Lip Extension For The GEM ER310 Series Lock

Description

The metal lip extension for GEM ER310 series of electric locks, offers a practical and valuable addition to your access control system. This product safeguards deep door frames from potential damage, ensures a professional lock installation finish, and is available in two sizes for compatibility with various door frame depths. By adding this extension to your [GEM ER310](#) series lock, you can enhance both the functionality and aesthetics of your door hardware.

Key Features:

- **Compatibility:** Designed specifically for use with GEM ER310 series locks.
- **Door Frame Protection:** Provides a layer of protection for deep door frames, preventing potential damage from lock installation and operation.
- **Professional Finish:** Enhances the overall visual appeal of the lock installation by creating a clean and polished look.
- **Available Sizes:** Offered in two width options - 25mm and 50mm - to accommodate different door frame depths (please choose the appropriate size when ordering).
