

RGL-FMS-KEY
RGL FMS-KEY – Key for Firefighter Drop Switches

Description

The RGL FMS-KEY is the specific key designed for operating RGL's range of Fireman's Drop Switches, including both the FMS-SURF (surface mount) and FMS-FLUSH (flush mount) models. This dedicated key ensures that only authorised personnel, typically firefighters, can activate these emergency power isolation switches.

Key Features:

- **Specific Design:** Engineered precisely to operate [FMS-SURF](#) and [FMS-FLUSH](#) fireman's switches.
- **Authorized Access:** Restricts operation of emergency switches to fire personnel, maintaining security.
- **Durable Construction:** Built to withstand the rigors of emergency use.
- **Essential Safety Tool:** A critical component for fire safety protocols, enabling quick power disconnections when needed.

Product Specifications

Weight	0 kg
Brand	RGL
Device-type	Firemans Switch Key
