

RGL-FMS-SURF
RGL FMS-SURF – Surface-Mount Firemans Switch

Description

The RGL FMS-SURF provides a dependable and highly visible solution for emergency power isolation, offering firefighters an essential tool to enhance safety and control during critical building incidents.

Key Features:

- **Surface-Mount Design:** Provides straightforward installation directly onto a wall or surface, suitable for various building types and existing installations.
- **Emergency Power Isolation:** the RGL FMS-SURF Enables firefighters to rapidly cut power to critical systems such as electronic locks, access control systems, or other electrical equipment in an emergency.
- **NO/COM/NC Changeover Contacts:** Equipped with versatile normally open, common, and normally closed contacts, allowing for flexible integration into a wide array of control circuits.
- **Tamper-Proof Fixings:** Ensures the unit remains securely installed and prevents unauthorized tampering or misuse.
- **Durable Stainless Steel Construction:** Manufactured from high-quality stainless steel for exceptional resistance to corrosion, wear, and impact, ensuring long-term reliability in demanding environments.
- **Drop Key Operation:** Designed exclusively for activation by a specific fireman's drop key (key not included), ensuring that only authorised emergency personnel can operate the switch.
- **Compact Dimensions:** Measures 125x155x76 mm, making it a visible yet manageable addition to an emergency access point.

Product Specifications

Weight	0 kg
Brand	RGL
Construction	Stainless Steel
Mounting	Surface Mount
Device-type	Fireman Switch
