

INT-08-01-VP
Intratone Electronic MIFARE Keyfobs

Description

Intratone MIFARE contactless keyfob for use with Intratone door panels. Each fob is supplied encoded and uniquely numbered to prevent replication. With a stainless steel insert making the fob both ergonomic and durable, the range consists of ten colours to choose from - please select when ordering. Intratone also offer alternatives such as hands-free active fobs that are read automatically by the panel when approximately one metre away and active transmitter MIFARE keyfobs allowing further access upon the click of a button.
