Intratone "Call Caretaker" Audio Intercom System

Description

"Intrabox" Stainless Steel Flush-Mount Caretaker Call Panel System kit comprising of:

- stainless-steel flush-mount door panel
- relay card (*Intratone p/n 12-0110*)
- 3G transmission module
- 15-year GSM unlimited-data plan

Pressing a call-button initiates an intercom call over the GSM mobile network to a pre-programmed telephone number. The receiver of the call can then talk to the person at the door panel and can also unlock the door remotely to let them in if required. The inclusive GSM unlimited-data plan ensures that no call charges apply for 15 years - a factory-fitted integrated SIM card in the transmission module completes the system just like a mobile phone. Ideal for calling a caretaker / estate manager either in a fixed location or "on the move" with a mobile phone. Caretaker / estate manager phone numbers are programmed into the system by secure logging-in to Intratone's website-based portal from anywhere within the World. Once changes / additions have been made & saved, the portal automatically connects to the call panel via the GSM mobile network and uploads the updates. A factory-fitted integrated SIM card in the transmission module completes the system just like a mobile phone receiving & making calls. Available in 1-button, 2-button and 3-button versions - please select when ordering. System requires a 12-24VDC 2A power supply.
