

SR1-MAG-MSK
Maglock Electromagnet Safety Strap Kit

Description

Suitable for where an assessment has identified a need to reduce the risk of the maglock electromagnet falling from the door-frame. Each wire safety strap is affixed to each end of the electromagnet and then secured to the door-frame. Please note that, depending on the actual model, the electromagnet may need to be drilled to allow the straps to be affixed. Kit comprises of 2 straps and 2 screws. Electromagnet not included.
