

SR1-BGS-STOPSPACE50
50mm Spacer Suitable For Flush Mount Stopper

Description

The 50mm Spacer offers a practical solution for extending the depth of flush mount stoppers, allowing for the installation of surface-mounted break glass units. This simple spacer provides increased installation flexibility, simplifies the installation process, and ensures proper functionality of the break glass unit within the stopper housing. The 50mm Spacer is an essential accessory for situations where compatibility between surface-mounted break glass units and flush mount stoppers is required.

Key Features:

- **50mm Depth Extension:** Provides an additional 50mm of internal space within the flush mount stopper.
- **Compatibility:** Designed for seamless integration with [SR1-BGS-WSTOPPER](#) units.
- **Surface-Mounted Break Glass Unit Accommodation:** Allows for the installation of surface-mounted break glass units within the flush mount stopper.
