Surface Mounted Stopper For Emergency Exit Break Glass Units

Description

Protect your emergency exit systems with our Surface Mounted Stopper for emergency exit break glass units. Crafted from durable UV-stabilised polycarbonate, this clear cover is designed to prevent damage and misuse of exit buttons, switches, or call points. It's ideal for surface mount applications and includes a 5mm spacer for easy installation, ensuring a reliable solution for enhanced security. The green label features a clear legend instructing users to "Lift Cover, Break Glass To Open Door" during emergencies. Trust in the robust design of this stopper to safeguard your exit infrastructure, offering peace of mind and durability for your security needs. Please note that the call point pictured is not included but available separately.
