

CQ-K2-3G
Control Freq K2 GSM Intercom with Keypad

Description

The K2 is a highly configurable GSM intercom, for 2 separate properties, with remote online configuration & user management. The unit is a robust design with a brushed stainless steel fascia within a powder-coated stainless steel surface backbox. The IP68 antenna is pre-fitted into the top of the unit eliminating the need to install an external antenna. The stainless steel keys on the unit are LED backlit with an IP68 silicone membrane behind for maximum protection against the ingress of water and dust. The unit operates on 2G/3G and 4G with a 4G (vo-LTE ready) module onboard for future-proof mobile connectivity. Door release can be activated from the user's phone keypad during a call and also at any other time by Caller-ID 'free-call', SMS, App, Web-browser or via preset times using inbuilt 24/7/365 time-clocks.
