

INT-06-0129

Intratone 06-0129 – Intrabox Data Mini with Built-in HF Receiver + 10 Years of Free Data

Description

The Intratone 06-0129 is a comprehensive and advanced access control solution, combining a GSM/GPRS module with a built-in HF receiver for seamless wireless communication. This kit offers 10 years of free data and empowers users with real-time remote management capabilities.

Key Features:

- **Integrated GSM/GPRS Module:** The Intratone 06-0129 enables remote management and data updates via GPRS.
- **Built-in HF Receiver (868MHz):** Securely communicates with [Intratone transmitters](#).
- **10 Years Free Data:** Eliminates data costs for a decade.
- **Real-Time Remote Management:** Manage access control remotely via the Intratone online platform.
- **Live User Management:** Add, change, or remove user codes and remote controls instantly.
- **Multiple Access Points:** Control multiple entry points with individual settings.
- **Time Range and Timer Functionality:** Schedule access with specific opening times and holiday settings.
- **Dial to Open and Mobile Key Entry:** Offers convenient telephone and mobile access options.
- **Multi-User Support:** Accommodates up to 10,000 users.
- **Secure 868MHz Rolling Code:** Ensures secure wireless communication with transmitters.
- **Email Alerts:** Receive notifications for important events.
- **Event Log:** Stores data for up to 3 months for audit trails.
- **Dual Relay Outputs:** Provides 2 output relays to provide flexibility for controlling multiple devices.
- **USB Programmer Accessory (Optional):** Simplifies configuration of multiple remote controls.

Product Specifications

Weight	330 kg
Brand	Intratec
Frequency	868 MHz, GSM
Power-requirement	12-24 VDC/VAC
Output-relays	2
Operating-temperature	-20°C to 60°C
