

RGL-EBPP02P/DDA
RGL EBPP02P/DDA DDA Compliant Exit Button

Description

The RGL EBPP02P/DDA DDA Compliant Push-To-Open Exit Button offers a reliable and user-friendly solution for access control, prioritising accessibility for everyone. This DDA-compliant button ensures effortless activation and caters to various installation needs. With its combination of functionality, durability, and ease of use, this is a valuable asset for creating inclusive access points in different environments.

Key Features:

- **DDA Compliant:** Conforms to Disability Discrimination Act (DDA) regulations, guaranteeing accessibility for users with disabilities.
- **Wear-Resistant Legend:** Maintains clear button identification over time.
- **Voltage-Free Contacts:** Simplifies integration with access control systems.
- **Double Pole NO/NC Contact:** Enables compatibility with various access control systems (30VAC/DC).
- **4 Amp Contact:** Supports a wide range of applications.
- **Complies with BS8300:** Meets British Standards for escape route indicators.
- **Security Screws (Allen Key Type):** Deters tampering and unauthorised access.
