

695-644

Paxton 695-644 Proximity Keyfob For Net2 System – Pack Of 10

Description

The Paxton 695-644 is a pack of ten high-security proximity keyfobs specifically designed for seamless integration with the Paxton Net2 access control system. These robust keyfobs utilise Hitag2 technology with proprietary encoding, offering an advanced and convenient method for users to gain access.

Key Features:

- **Net2 System Compatibility:** These Paxton 695-644 keyfobs are designed exclusively for use with the **Paxton Net2 access control system**.
- **High-Security Encoding:** They use **Hitag2 technology** with **proprietary encoding**. This includes an **authentication protocol** (password exchange between the fob and reader) which provides an **additional layer of security** against cloning.
- **Contactless Operation:** The fobs operate at a **125kHz carrier frequency**, allowing users to simply present the token to a reader for instant access validation.
- **Moisture Resistance:** Rated at **IPx7**, meaning the fob is protected against immersion in water up to 1 meter deep for up to 30 minutes.
- **Material and Durability:** Constructed from **ABS/Plastic**, offering durability for everyday use.
