RGL 2-Position Maintained Surface-Mount Key Switch – Single-Gang

Description

Introducing our versatile 2-Position Maintained Surface-Mount Key Switch. Crafted for convenience, this slim line key switch is designed for easy installation on various surfaces, including architraves, ensuring flexibility in placement. Tailored for architraves, this slim profile key switch features a sleek brushed aluminium design, adorned with clear "ON" and "OFF" indicators. Its single-pole changeover switch contact (NO-COM-NC) comes with wired tails, facilitating straightforward connection. With its maintained functionality, this key switch securely holds its position even after the key is removed, offering reliability and peace of mind.
