

IPV11AGLS

Farfisa IPV11AGLS – Agora 1 Button IP Door Station

Description

The Farfisa IPV11AGLS is a sleek and robust 1-button IP door station belonging to the Agora series, designed for building advanced video intercom systems over IP networks. This door station offers a wide range of uses and seamless integration with VoIP PBX (SIP) systems, providing modern communication and access control.

Key Features:

- **Single Call Button:** Ideal for single residences or specific access points.
- **IP Connectivity:** Enables flexible installation and integration over IP networks.
- **VoIP PBX (SIP) Integration:** Allows seamless communication with standard VoIP phone systems.
- **Wide-Angle Camera (110°):** Provides a broad field of view for enhanced visitor identification.
- **Expandable Call Buttons:** Can be expanded up to 130 call buttons with the IPT08AGLS module for multi-tenant applications.
- **Multiple Users per Call:** Supports up to 5 users per call, configurable as a group or in sequence.
- **Dual Door Sensor Inputs:** Allows monitoring of door status for added security.
- **Two Built-in Relay Outputs:** Provides control for door locks, gates, or other devices.
- **Management of Up to 2 Remote Web Relays:** Offers extended control capabilities.
- **Missed Call Notification via Email:** Sends email alerts with attached pictures for unanswered calls.
- **Power over Ethernet (PoE) or 12Vac/dc Power Supply:** Offers flexible power options.
- **Agorà Series Design:** Features a modern and durable aesthetic.

Product Specifications

Weight	kg
Brand	Farfisa
Operating-temperature	0°C to 50°C
Power-requirement	12V DC/AC, PoE
Output-relays	2
Protection-rating	IP34
