

PL11PED
Farfisa PL11PED 1-Button Profilo Door Station Module

Description

The Farfisa PL11PED is a user-friendly and aesthetically pleasing solution for enhancing your building's entry system. This 1-button door station module combines clear communication with a modern design, offering seamless integration with both reduced wiring and advanced digital intercom systems.

Key Features:

- **Integrated Door Speaker:** Facilitates clear two-way communication between visitors and residents.
- **Single Call Button:** Provides a simple and intuitive way for visitors to announce their arrival.
- **Reduced Wiring Compatibility:** Designed for use with systems requiring minimal wiring, simplifying installation.
- **Digital DF6000 System Compatibility:** Seamless integration with Farfisa's advanced DF6000 digital intercom systems.
- **Aluminium Construction:** Lightweight yet durable design ensures long-lasting performance.
- **Modern Aesthetic:** Sleek aluminium finish complements any architectural style.
