

INT-06-0130

Intratone 06-0130 – Keypad and GSM Module Receiver Kit with 10 Years Unlimited Data

Description

The Intratone 06-0130 is a comprehensive access control kit that combines a mini coded keypad with a GSM/GPRS module receiver, providing a robust and remotely manageable solution. This kit includes 10 years of unlimited data, enabling seamless online management and control.

Key Features:

- **Complete Access Control Solution:** Combines keypad entry with remote management.
- **Cost-Effective:** 10 years of unlimited data eliminates ongoing data costs.
- **Remote Management:** Control and manage access from anywhere with an internet connection.
- **Enhanced Security:** Secure wireless communication and robust keypad design.
- **Convenient Access:** Multiple access options, including keypad, mobile entry, and dial-to-open.
- **Flexible Scheduling:** Time range and timer functionality for customised access control.
- **Scalable Solution:** Supports up to 10,000 users and expandable with additional keypads.
