

2281Q

Farfisa 2281Q Actuator For The DUO System

Description

The Farfisa 2281Q Actuator for the DUO System offers a user-friendly and efficient solution for expanding your DUO smart home system's functionality. By eliminating the need for additional wiring, this innovative unit simplifies installation and empowers you to control various auxiliary services and home automation features wirelessly. With its ease of use, versatility, and space-saving design, the Farfisa 2281Q is a valuable addition to any DUO system.

Key Features:

- **Designed for DUO System:** Seamless integration with your existing DUO system for effortless expansion.
- **Wireless Activation:** Control auxiliary services and home automation features without additional wiring, simplifying installation and setup.
- **Smart Relay:** Provides a relay output for activating a range of services and an input port for receiving control signals.
- **Programmable Functions:** Customise relay activation time (0-99 seconds) to suit your specific needs.

Product Specifications

Weight	kg
