Intratone 06-0226 21-inch Interactive Notice Board Kit

Description

The Intratone 06-0226 21-inch Interactive Notice Board Kit offers a modern and efficient solution for resident communication. With its real-time updates, remote management capabilities, and interactive features, this digital notice board eliminates the need for paper displays and streamlines information sharing within your buildings. The kit includes a transmission module, and unlimited data synchronisation for 15 years.

Key Features:

- **Real-Time Communication:** Create and update messages from your computer in minutes and broadcast them instantly to all or specific sections of your building with a single click.
- **Enhanced Engagement:** Residents can navigate between posts using scroll keys, fostering a more interactive information experience.
- **Integrated Polling Function:** Gather valuable resident feedback and opinions through built-in polling features.
- **Large 21-inch Display:** Provides clear and easy-to-read information for residents.
- **Durable Design:** Built for indoor use with an IP52 rating for protection against dust and light moisture.
- **Long-Range Connectivity:** 4G module enables connection over the GSM network, or you can wire up to 100 meters using standard cabling (4 wires (2 twisted pairs) - diameter 8/10th).
- **Unlimited Data:** For 15 years
