Comelit LS9461M Logos Home Intercom System

Description

The Comelit LS9461M Logos Home Intercom System offers a user-friendly and feature-rich solution for enhanced communication and security in your home. This pre-programmed kit ensures a smooth installation process, while the scalable design allows you to adapt the system to your specific needs. With its clear visuals, two-way audio communication, and compatibility with Simplebus 2 systems, this intercom system promotes a safe and convenient living environment.

Key Features:

- **Pre-programmed for Easy Setup:** Enjoy a quick and hassle-free installation with the pre-programmed components.
- **Scalable System:** Expandable with additional door entry monitors (up to 4 per residence) and entrance panels (using optional accessories) to suit your needs (refer to technical documentation for details).
- **Clear Visual Communication:** See visitors on the high-resolution colour display of the door entry monitor.
- **Two-Way Audio with Handset:** Engage in private conversations with visitors using the integrated handset.
- **Simplebus 2 Compatibility:** Benefits from seamless integration with existing Simplebus 2 systems.
- **Suitable for Single-Family Homes:** Designed to create a secure and convenient intercom network for your home.
