

SPC-E652.100

Acre SPCE652.100 – Expander With Front And Back Tamper Protection (8 Input And 2 Output)

Description

The Acre SPCE652.100 expander offers a valuable solution for expanding the capabilities of your Acre intrusion and SPC security system. This user-friendly expander provides additional wired zones, programmable outputs, and a range of configuration options to enhance system flexibility, control, and overall security effectiveness.

Key Features:

- **Increased System Capacity:** The Acre SPCE652.100 expands your system's capabilities by adding eight wired zones for connecting various sensors and detectors.
- **Enhanced Control with Two Outputs:** Provides two programmable relay outputs to control external devices like sirens, door locks, or automated systems based on security events.
- **Easy Configuration:** The expander can be conveniently configured directly from the embedded web server or using any Acre intrusion keypad, simplifying system management.
- **Cause and Effect Integration:** Program automated system responses to specific security events, enhancing overall security effectiveness.
- **Highly Customisable Inputs:** Each of the eight inputs can be configured for various functions, such as: alarm, entry, panic, tamper, or fault, allowing for tailored system operation.
- **Customisable Input EOL (End-of-Line):** Offers flexible configuration of the end-of-line resistance for various wired detectors and sensors, ensuring compatibility.
- **Individual Input/Output Naming and Logging:** Assign descriptive names to each input and output for easier system identification and enable individual logging for detailed audit trails.
- **Versatile Output Functionality:** Each output of the Acre SPCE652.100 offers three selectable modes of operation (continuous, pulse, momentary) and the ability to be restricted by calendars, providing control flexibility for various security applications.
- **Comprehensive Output Testing:** A dedicated test function allows for individual verification of each output's functionality, ensuring system reliability.
- **Front and Back Tamper Protection:** The expander features tamper switches on both the front and back panels, triggering an alarm if the unit is tampered with.

Product Specifications

Weight	kg
Brand	ACRE
Series	<i>Acre Intrusion, SPC</i>
Device-type	<i>Expander</i>
Operating-temperature	-10°C to 50°C
