SPC-E452.100
Acre SPCE452.100 – 8 Relay Output Expander

Description

The Acre SPCE452.100 expander is a valuable asset for any Acre intrusion security system seeking to extend control capabilities and automate security responses. This expander's 8 programmable relay outputs offer a high degree of flexibility for integrating with various devices and creating a more comprehensive security solution.
Key Features:

- **8 Programmable Relay Outputs:** Control a wide range of external devices, for example, door strikes, lights, sirens, or gates based on system activity or user commands.
- **Enhanced System Automation:** Automate security responses, such as triggering alarms or door locking upon system activation.
- **Increased Functionality:** Integrate the expander with other security system components to create a more comprehensive security solution.
- **Volt-Free Relays with NO/NC Terminals:** Provides maximum flexibility for connecting various devices and controlling their operation.
- **Easy Configuration:** Conveniently program each relay output directly from the Acre intrusion system's control panel.
- **Tamper Protection:** Front and back tamper switches safeguard the expander's integrity and system reliability.
- **X-BUS Connectivity:** Seamlessly connects to your existing Acre intrusion system via the X-BUS communication protocol.
- **Status LED and Buzzer:** Offers visual and audible feedback for easy device identification and troubleshooting.

Product Specifications

Weight	*kg*
Brand	*ACRE*
Series	*Acre Intrusion, SPC*
Device-type	*Expander*
Operating-temperature	*-10°C to 50°C*
