

ML600-MDS
RGL ML600-MDS – Fire Resistant Mini Maglock (Monitored)

Description

The RGL ML600-MDS is a compact and powerful fire-resistant mini maglock, designed to provide reliable security for a wide range of applications. This monitored maglock offers several key features:

Key Features:

- **Fire Resistance:** Fire Tested to BSEN1634-1-2014 for fire resistance up to 120 minutes on timber door sets.
- **Strong Holding Force:** 280kg holding force for secure door control.
- **Monitored Operation:** Provides continuous monitoring of the lock's status.
- **Dual Voltage:** Compatible with 12VDC and 24VDC power supplies.
- **Compact Design:** Sleek and unobtrusive installation.
- **Easy Installation:** Simple and straightforward installation process.

The RGL ML600-MDS is ideal for securing doors in various settings, including commercial buildings, residential properties, and industrial facilities. Its reliable performance and robust construction ensure long-lasting durability and security.

Product Specifications

Weight	kg
Brand	RGL
Lock-options	Monitored
Construction	Aluminium Alloy
Holding-force	600 Lbs
Mounting	Surface Mount
Operating-temperature	-10°C to 50°C
Power-requirement	12-24 VDC
Safety-features	Fail-Safe, Fire Resistant
Form-factor	Mini Maglock
Fire-rating	BSEN1634-1-2014
