

KFS-F10CMULTI
Knight Fire F10CMULTI – Roller Shutter Contact Suitable For Double Doors (Grade 2)

Description

The Knight Fire & Security F10CMULTI Roller Shutter Contact is a Grade 2 universal contact designed for double doors and roller shutter security applications. Featuring selectable resistors and a 1-metre armoured sleeving, this robust contact is compatible with all mainstream UK control panels. With an 8-wire configuration, built-in tamper protection, and a 50mm operation gap, it ensures reliable performance in demanding environments.

Key Features:

- **Grade 2 Certified (BS50131-2-6:2004 Compliant)** – Ensures industry-standard security performance.
- **Universal Compatibility** – Works with all major UK alarm control panels.
- **Selectable Resistors** – Choose from multiple resistance values to suit your panel.
- **8-Wire Terminal Configuration** – Provides flexibility for different wiring setups.
- **Tamper-Protected Sealed Unit** – Detects unauthorised removal or interference.
- **1-Metre Armoured Sleeving** – Protects wiring from damage and tampering.
- **Large Operation Gap (50mm Approx.)** – Suitable for roller shutters and wide door gaps.
- **Durable Construction** – Designed for **harsh environments** and **heavy-duty applications**.
