

KFS-F10C

Knight Fire & Security F10C – Security Contact For Roller Shutter (Grade 2)

**Description**

The Knight Fire & Security F10C is a Grade 2 roller shutter contact featuring a single reed switch and 1 metre of armoured sleeving for added protection. With 4-wire connectivity (2 alarm, 2 tamper) and a 50mm operating gap, this durable aluminium contact is built for outdoor sheltered environments and high-security installations.

**Key Features:**

- **Grade 2 Security Compliance** – Meets **EN50131-2-6** for professional security installations.
- **Single Reed Contact** – Provides **reliable activation**.
- **1-Metre Armoured Sleeving** – Protects the cable from **damage and tampering**.
- **4-Wire Connectivity** – Includes **2 alarm wires and 2 tamper wires**.
- **Robust Aluminium Construction** – **Corrosion-resistant** and suitable for **industrial environments**.
- **Environmental Class III** – Suitable for **outdoor sheltered installations**.
- **50mm Operating Gap** – Ensures **flexible yet secure activation**.
- **Ideal for Roller Shutter Doors** – Designed for **commercial and industrial applications**.
