

SS-HDD-3

Seagate SkyHawk 3TB SATA Hard Drive for 24/7 Surveillance Recording

**Description**

The Seagate SkyHawk 3TB SATA hard drive is a cutting-edge storage solution specifically engineered to meet the demanding needs of modern CCTV surveillance systems. Optimised for continuous 24/7 video recording, this drive offers exceptional reliability and performance for your security footage, utilising the high-speed SATA interface for seamless integration.

**Key Features:**

- **3TB Capacity:** The 3TB SATA hard drive provides substantial storage for surveillance video data.
- **SATA Interface:** Ensures high-speed data transfer and easy integration with modern systems.
- **Optimised for CCTV:** The SkyHawk 3TB SATA Hard Drive is tuned for 24/7 operation in DVR and NVR security camera systems.
- **High Workload Support:** Handles up to 180 TB of data per year, supporting up to 64 HD cameras simultaneously.
- **Seagate ImagePerfect™ Firmware:** Reduces dropped frames and downtime for smooth, clear footage.
- **Rotational Vibration (RV) Sensors:** Maintains performance in multi-bay systems for flexible scalability.
- **SkyHawk Health Management:** Easily monitor drive health for proactive maintenance.
- **Efficient Power Consumption:** Reduces heat emissions and enhances drive reliability.
- **1 Million Hours MTBF:** High mean time between failures for long-term reliability.
- **3-Year Warranty:** Provides peace of mind with comprehensive support.

#### Product Specifications

Weight	490 kg
Brand	Seagate
Device-type	Hard Drive
Storage	3TB
