Authenticard ISO-M1 – Blank MIFARE S50 EV1 1K Cards with Optional Magstripe

**Description**

The Authenticard blank MIFARE Classic S50 EV1 1K cards provide a secure, versatile solution for contactless identification across a wide range of applications. With a 4-byte Non-Unique Identifier (NUID) and 1KB of memory, these durable cards are ideally suited for access control, ticketing, loyalty schemes, and general smart card use.

**The MIFARE Classic 1K EV1 Cards Are Available in two variants**

- Standard blank white (A-ISO-M1)
- Featuring a high coercivity (HiCo) magnetic stripe (A-ISOH-M1) – this product offers added flexibility for integrators and system installers needing scalable and reliable card technology.
