

SR1-BGS-303-LSRC-42
CP3-LSRC-DB – Triple Pole Resettable BGU With Deep Back Box

Description

The CP3-LSRC-DB is a versatile triple pole resettable break glass unit (BGU) designed for emergency door release, offering both surface and flush mounting options thanks to its included deep back box. This unit provides a reliable and compliant solution for emergency egress, featuring clear visual and audible indications.

Key Features:

- **Triple Pole Configuration:** Provides three independent sets of contacts, allowing for flexible wiring and integration with various security and access control systems.
- **Resettable Mechanism:** Easily reset after activation using the supplied key, eliminating the need for replacement glass and reducing ongoing maintenance costs.
- **Deep Back Box Included:** Facilitates both surface and flush mounting installations, offering greater flexibility in deployment.
- **Integrated Sounder:** Features an adjustable sounder (65 to 85dB) to provide an audible alert upon activation, drawing immediate attention to the emergency.
- **Bi-Coloured LED Indicators:** Includes adjustable dual-colour LEDs that clearly indicate the unit's status (e.g., armed, activated).
- **Protective Cover:** Supplied as standard to prevent accidental activation.
- **Single Gang:** Designed to fit standard single gang electrical boxes for straightforward installation.
- **Wide Power Compatibility:** Operates on 12Vdc or 24Vdc power supplies.
- **High Contact Rating:** Contacts rated at 3A @ 125V for reliable switching.

Product Specifications

Weight	kg
Colours	Green
Connection-type	Terminal connection
Construction	Plastic
Contacts	1-pole changeover (1 x SPDT), 2-pole changeover (2 x SPDT), 3-pole changeover (3 x SPDT)
Mounting	Surface Mount
Power-requirement	12-24 VDC
