

INT-35-0005

Intratone 35-0005-EU: Wireless GSM (4G) Intercom Kit for up to 10 Users and 2 Doors

### Description

The Intratone 35-0005-EU is an advanced and comprehensive video GSM intercom kit designed for multi-tenant properties, offering robust access control and flexible communication. This kit stands out with its included 03-0101 2-Door Central Unit, capable of managing up to 1000 names/users across two separate doors (additional readers may be necessary), making it ideal for more complex access requirements.

#### Key Features:

- **1-10 Way Video Intercom:** Allows direct dialling by flat number for up to 10 residences, ensuring straightforward visitor communication.
- **Vandal-Resistant DD-02 Panel:** Constructed from robust stainless steel (150 x 300 x 2.5 mm) with an IP54 protection level, designed to withstand tampering and harsh weather.
- **Invisible Pinhole Camera:** A discreet camera integrated into the panel provides video of visitors, enhancing security without compromising aesthetics.
- **User-Friendly Backlit Keypad:** Features a backlit keypad with distinctive yellow rings around keys and braille markings, ensuring accessibility for all users.
- **Integrated Proximity Reader:** Offers convenient, secure access for residents using key fobs.
- **4G Transmission Module:** Enables wireless communication for video calls to smartphones/tablets and audio calls to traditional landlines, offering flexibility for residents.

#### 35-0005-EU Kit Contents:

- 1 x DD-02 - Video Panel (Stainless Steel)
- 1 x 03-0101 - 2 Door Central Unit
- 1 x 4G Transmission Module
