

SR1-MAG-150ZL

SRD SR1-MAG-150ZL: Z & L Bracket for Micro Mag Lock

Description

The SRD SR1-MAG-150ZL is a versatile and essential Z & L bracket kit specifically designed to facilitate the secure installation of micro maglocks (typically 300lb holding force) on inward-opening doors. Constructed from durable anodised aluminium, this fully adjustable bracket set ensures precise alignment and robust mounting for your access control system.

Key Features:

- **Dedicated for Micro Mag Locks:** Specifically engineered to provide optimal mounting for smaller electromagnetic locks, ensuring perfect compatibility and performance.
- **Fully Adjustable Design:** Allows for precise positioning and alignment of the armature plate with the magnet, crucial for achieving the full holding force and reliable operation of the mag lock.
- **For Inward Opening Doors:** Tailored for doors that open inwards, providing the necessary depth and angle to correctly mount the mag lock and armature plate.
- **Durable Anodised Aluminium Construction:** Made from high-quality anodised aluminium, offering excellent resistance to corrosion and wear, ensuring long-lasting performance in various environments.
- **Comprehensive Kit:** Includes all necessary components for the Z & L bracket set, simplifying the ordering and installation process.
- **Compact Dimensions:** Measures 284 x 46 x 71mm, providing a robust mounting solution without excessive bulk.
