

STEALTH320

STEALTH320: Slim Armature Plate Housing for Stealth Maglocks

Description

The STEALTH320 is a slim and discreet armature plate housing designed to enhance the aesthetics and simplify the installation of Stealth series magnetic locks. This specialized surface mount housing eliminates the need to drill through the door, providing a clean and professional finish. With its stealth black finish and fire-rated construction, the STEALTH320 is the ideal solution for both new installations and retrofits where aesthetics and safety are paramount.
