

STEALTH520

STEALTH520: Black Armature Housing For Standard Magnetic Locks (1200lb Holding Force)

Description

The STEALTH520 is a robust and aesthetically pleasing armature housing designed for standard-sized magnetic locks (typically 1200lb holding force). Finished in a sleek stealth black, this surface-mount housing provides a clean, non-invasive installation method that eliminates the need to drill completely through the door. The STEALTH520 is the ideal accessory for achieving a professional finish, ensuring safety compliance, and preserving the integrity of the door.

Technical Information:

- **Dimensions (L x W x D):** 195mm x 70mm x 20mm
- **Stand-off Distance:** Stands the armature plate off the door surface by 9mm
- **Finish:** Stealth Black
- **Mounting:** Surface mount
- **Compatibility:** All 'standard' maglocks
- **Fire Rated:** Yes
- **Fixing kit included**
- **Note:** When used with 'DS' (door status) maglocks, one of the end caps must be removed.
