

XPR-XP-PB

XPR XP-PB: Touch Capacitive Exit Button – Suitable For External Use

Description

The XPR XP-PB is a high-specification, touch capacitive "Request to Exit" (REX) push button designed for both internal and external use. Combining modern aesthetics with extreme durability and security, this button is the ideal partner to the XPR access control range, particularly the XPM reader series, which it is colour-matched to. Its advanced capacitive technology and robust ratings ensure reliable, non-mechanical operation in demanding environments.
