

EAT-KIT-80HE-VP

Scantronic 80HE Kits – 40-Zone Alarm System Kit with Wired or Wireless Keypad

Description

The Scantronic 80HE Kits offer a complete, Grade 2 intruder alarm solution in a single box, perfectly suited for residential and small-to-medium-sized commercial premises. The core of the system is the highly versatile hybrid (wired and wireless) control panel, which starts with 40 zones and is fully expandable up to 80 zones. The kit provides essential peripherals - PIRs, a door contact, and prox tags, and offers a choice between a traditional wired keypad (KIT-80HE-WKP) or a flexible wireless keypad (KIT-80HE-RKP). With a built-in Ethernet port, the 80HE panel comes ready for immediate, free-of-charge integration with the Eaton SecureConnect™ smart security cloud.

Technical Specifications:

- **Control Panel:** Scantronic 80HE (formerly i-on40H).
- **Max Zones:** Up to 80 zones total (starting at 40 inbuilt zones).
